

GV-Web Report

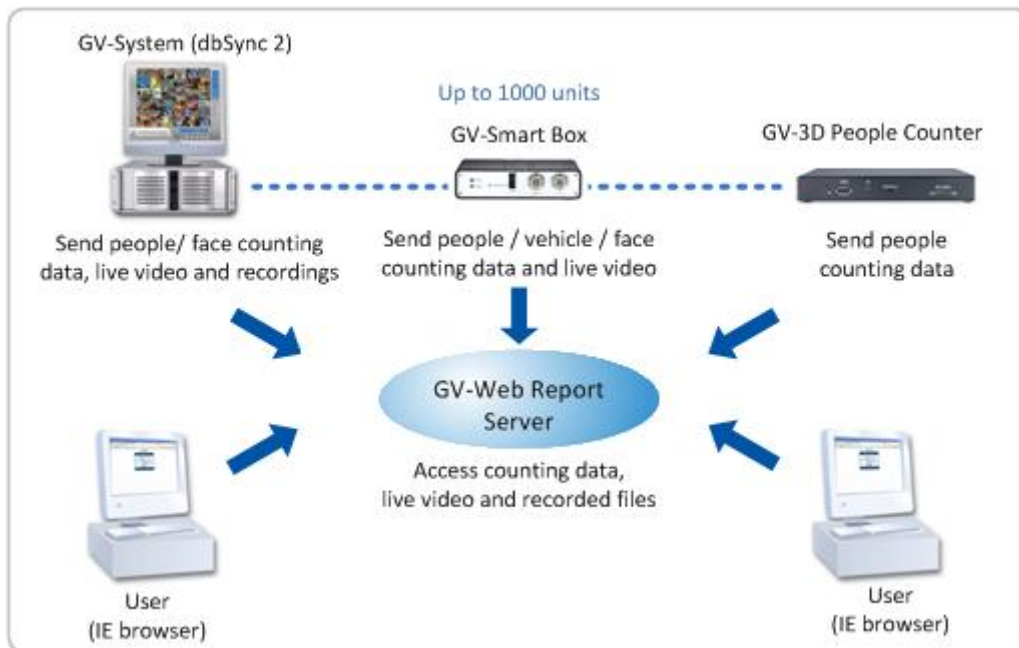

Introduction

The GV-Web Report is designed to integrate and analyze the people counting and face counting data from GV-Systems and GV-Smart Boxes, as well as object size counting results from GV-Smart Boxes. Suitable for large-scale video surveillance deployments, it can receive the data from up to 1000 units of GV-3D People Counters, GV-Systems and GV-Smart Boxes.

Through the Web interface of GV-Web Report, you can access the reports and graphs of real-time, hourly, daily, monthly and yearly statistics on people, face and object size counting results. You can also view the live video and the recordings from multiple locations.
