## GV-Cloud Center / GVcloud Notify App

INTRODUCTION

The GV-Cloud Center is a cloud-based service that allows you to search events of all connected GV-VMS and GV-Recording Server. Using **GVcloud NotifyApp**, you can receive notifications, look up events, access live view and play back recordings from any iOS or Android mobile devices. Without installing any software, you can also log onto **GV-Cloud Center Portal** from a Web browser on any PC to access GV-Cloud Center for event search and playback.

Key Features

GV-Cloud Center Portal

- Monitoring the status of cameras, I/O and storage space of connected hosts
- Searching events for up to one month and 2 months for POS/Counter events
- Playing back recordings
- Viewing the statistical graphs of POS and Counter results
- Generating outputs of retail activities
- Sharing the hosts with other GV-Cloud Center accounts

GVcloud NotifyApp

- Monitoring the status of cameras, I/O and storage space of connected hosts
- Searching events for up to one month and 2 months for POS/Counter events
- Seeing live view and playing back recordings
- Viewing the statistical graphs of POS and Counter results
- Generating outputs of retail activities
- Seeing the hourly Heat Map results of connected hosts
